Recent Feedback

(26-07-05)

"Just to thank you for my Wolf secateurs that arrived in the post today. I am very impressed indeed with the speed and efficiency demonstrated and delighted with my purchase."

P. Dowling

(26-07-05)

"Thank you once again for your superb super fast delivery and service."

Ordered yesterday and the postman left it in our shed this morning!

Thank you!"

R. Green

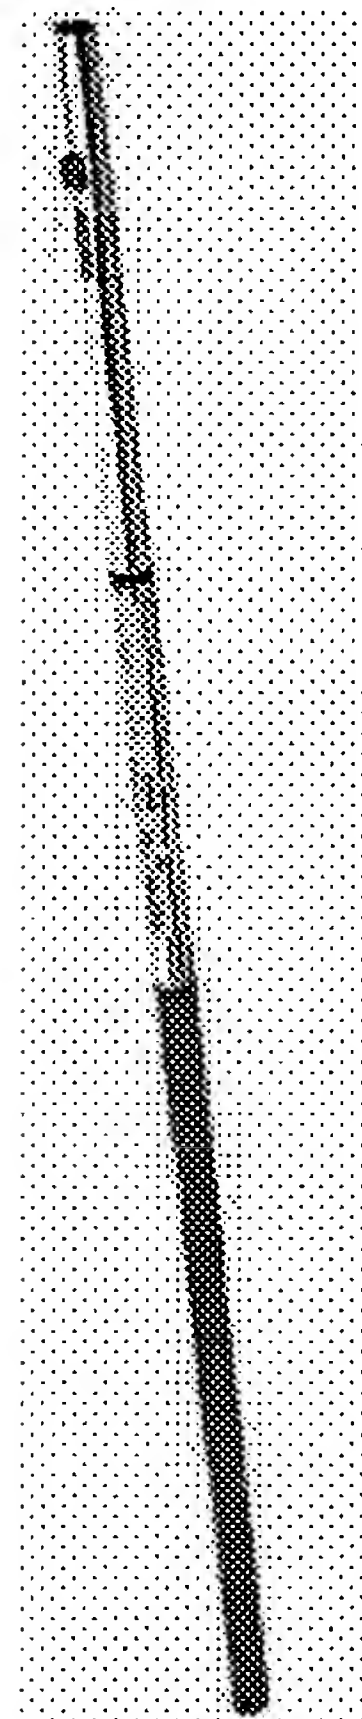

(14-07-05)

"Fantastic

I have bought many items on the internet over the years but I have to say that your service is second to none. You should be proud in this degree of efficiency and I now look forward to installing the first part of my watering system and you can rest assured I will be back for more."

Anytime I can recommend your company I will."

Wolf Garden Multi Change 120cm Telescopic Handle - ZMTL.

The Wolf Garden telescopic aluminium handle is suitable for use with tree & pond care equipment.

- ✓ Adjustable telescopic handle, from 117cm to 200cm.
- ✓ Made from lightweight, strong, high quality aluminium.
- ✓ Comfortable plastic sleeve.
- ✓ Fits all multi-change tool heads.
- ✓ Snap lock connection works just like a car seat belt.

garden4less.co.uk:
£19.98

Save space and extra cost with the Wolf Garden Tools range. The Wolf Garden multi change heads snap in and lock firmly, then release instantly when required, just like a seatbelt.

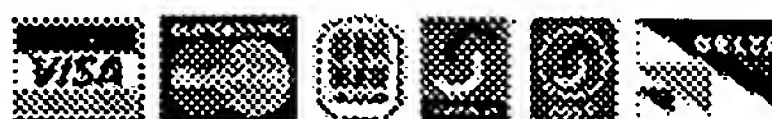

The Wolf Garden Tools system means you can use the same tool head for close work in beds or to reach the back of borders with just a simple change of the handle.

BRACA-SPORT Macon Blades

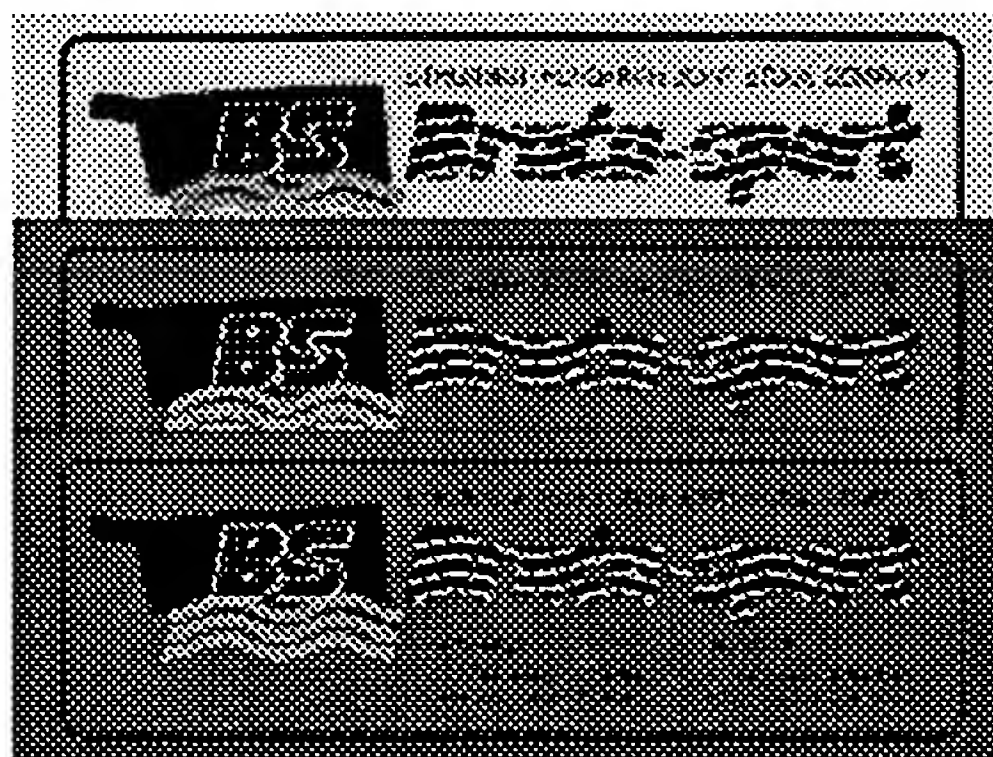

- ✦ Each blade has an extended sleeve for the attachment of the shaft. This method of assembling the two separate components has been extensively researched and tested. It has been proven to be the very best available method for strength, durability, and "in water" performance. The blade, the stiffened sleeve and the shaft all form one homogenous unit.
- ✦ All blades and shafts are constructed using an U/V protected heat cured toughened epoxy resin.
- ✦ Macon Blades are available in RECREATIONAL, STANDARD or ULTRA-LIGHT shafts.
- ✦ Macon Blades are available without adjustable handles for the RECREATIONAL weight and are available in adjustable handles for the STANDARD or ULTRA-LIGHT weights.
- ✦ Price: \$420.00 per pair for RECREATIONAL non-adjustable oars
- ✦ Price: \$475.00 per pair for STANDARD adjustable handle oars
- ✦ Price: \$495.00 per pair for ULTRA-LIGHT adjustable handle oars

- ✦ ULTRA-LIGHT (Yellow label) shafts are produced by using almost 100% pure High Modulus carbon. These shafts have both

- maximum lightness and 'stiffness'.
- ✦ **STANDARD** (Red label) shafts have a lower carbon content. They are less stiff than the Ultra light and are 20% heavier. This material combination has the highest possible impact resistance.
 - ✦ **RECREATIONAL** (Green label) still retains excellent 'stiffness' and 'feel', even though the carbon content has been reduced to 40%. They maintain high impact resistance and carry only a 11% weight premium over the Standard type.

Adjustable Handles:

The ULTRA-LIGHT, yellow label, and STANDARD, red label, sculls are manufactured with carbon handles, this allows for easy adjustment to the overall length.
